

Summary of the report:

The project use Scattering net and ResNet to extract the features of Raphael's paintings, use PCA to visualize the extracted features and classify them by SVM.

Strengths:

Well analysis of experiment results.

Weaknesses:

Just code and some analysis... Not a report.

Evaluation on Clarity and quality of writing (1-5): 1

Evaluation on Technical Quality (1-5): 3

Overall rating: 1

Confidence on your assessment (1-3): 3
