

# review of work of group1

Shifan Zhao

October 2019

## 1 Summary

This group firstly used t-sne and PCA to visualize features extracted by several networks, like scattering net, VGG19 and Resnet18. Then they do the classification using logistic regression.

## 2 Evaluation

The writting is clear:4

The result and details are clear:4

So I give them 4 with  $CI \in [2.5, 3]$ .
