Project 1 Review on Group 06

Summary of report

Feature extraction using pre-trained VGG19 and Scattering Net, visual comparison using t-SNE. Prediction is made using logistic regression on feature extracted by each method.

Strengths of report

The visualization of between the pre-trained VGG19 and Scattering Net is really helpful in understanding how well each model performs. The paper also have a detailed mathematical explanation of the Scattering Net.

Weaknesses of report

Nothing obvious.

Clarity and quality of writing

4. This is a well written report with good style and clear organization.

Technical Quality

4. The result is technically sound, and the two plot really helps visualize the result and making the author's point.

Overall rating

4. A good report.
