review of work of group13

Shifan Zhao

October 2019

1 Summary

This group firstly extracted features using Resnet and scattering net on Raphel dataset. And they used a weighted ensemble of classifier to do classification. The observation to use a ensemble of classifier is a good point.

2 Evaluation

The writting is clear:4
The result and details are clear:5
So I give them 4.5 with CI$\in [2.5, 3]$.
